

Improving Continence Care: Evidence Based Continence Care for Rehabilitation Nurses

Join ARN and the **Northeast Texas (NETX) Chapter** for this special event developed specifically for ARN chapters and chapter members on Tuesday, September 12 at 5:00 PM.

This event provides FREE CE for chapter members!

Date: Tuesday, September 12

Time: 5:00 PM Central Time

Location: BIR Frisco-2990 Legacy Drive, Frisco, 75034-Café

RSVP: Lisa Concannon, lconcannon@bir-rehab.com; 469-888-5204

Dinner will be provided by BARD and space is limited to 25 attendees, so RSVP required!

Christine will provide the latest knowledge and techniques that rehabilitation nurses need to assist individuals with bowel or bladder dysfunction related to disabling injuries or chronic conditions.

Education provided will review:

- Comprehensive assessment of bowel and bladder
- Non-invasive continence interventions for RNs
- Care techniques to improve self-management of continence and proper use of devices
- Case studies that demonstrate use of EBP recommendations for continence care

Christine Cave, DNP FNP-C MSN RN CRRN EP-C
Chronic Care Manager University of San Francisco Concord, CA

Upon completion the learner will be able to:

- Identify the barriers in current rehabilitation settings that prevent effective continence care.
- Identify how impairment of specific body systems (e.g. neuro, musculoskeletal, endocrine) may contribute to bowel or bladder dysfunction.
- Identify at least three techniques a rehabilitation nurse can employ to regulate bladder and bowel function during a rehabilitation stay.
- Articulate at least two techniques that can be used to educate incontinence patients and their families to promote a safe and successful discharge home.
